...I have attached my original [corrected] drawing...

Yes, I can send you one of the antennas tuned to one VHF and one UHF frequency. The cost is \$20 plus \$3 for shipping. The antenna is complete with exception of the 7 ft PVC 3/4 inch pipe which can be purchased from any hardware store. This is schedule 200 PVC not the schedule 40 which is too thick. I figure that sending the 7ft pipe through the mail will cost more than the plastic pipe which less than a dollar at Home Depot.

My address is:
 1163 Quince Ave.
 Sunnyvale, CA 94087

Thanks and 73's
 Ed Fong WB6IQN
